

What is the SEED Center?

The Sustainability Education & Economic Development (SEED) Center is an initiative of the American Association of Community Colleges (AACC). This comprehensive initiative aims to advance sustainability and green workforce development practices at community colleges by identifying and sharing innovative models, resources, and building the capacity of college leaders, faculty, and staff. As a SEED Center member, you will join other colleges as a recognized leader supporting the role of community colleges in fostering economic growth and fulfilling the requirements of the emerging green and sustainable economy.

Free Resources

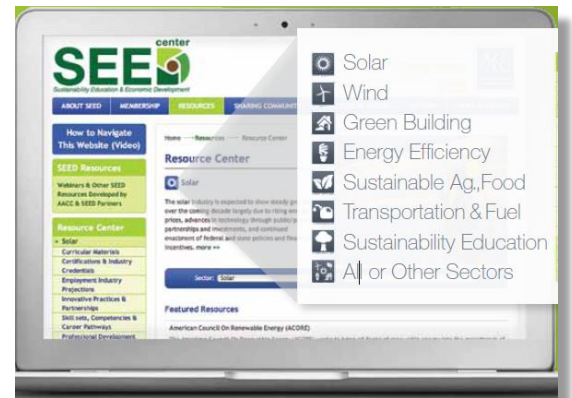

Resource Center - Contains over 500 searchable, curated curricular materials to support industries such as solar, wind, green building, sustainable agriculture, transportation, energy, water, and sustainability education.

Toolkits - A set of practical guides and actionable steps to help colleges prepare a skilled workforce to support the clean economy.

Webinars - Recordings of webinars devoted to a variety of topics supporting workforce training programs. All webinars contain national speakers and promising community college models.

Mentorship - Connect with some of the other 480+ SEED Center signatory colleges in the network to learn from their work in the field.

Promising Practices - Through social media, a monthly newsletter, and the SEED Center website, examples of community colleges exhibiting exemplary work surrounding sustainability education are highlighted.
